

OIT #0435-86
3 June 1986

NOTE FOR: DDI

FROM: Ed Maloney
Director, OIT

Dick:

The attached proposal was referred to us for comment by the Office of Logistics. This is the same proposal that was presented to our office by [redacted] We engaged in lengthy, office-wide discussion of this option. On balance, we concluded that at best it is a very short term fix (if it will work); furthermore, it ties us to the past in a way that we find limiting rather than enhancing.

To invest this 180K is your call, but we intend to proceed with the NEWS project and a generic NEWS capability as currently planned. Based on our earlier technical review of this option, NEWS consciously does not include special arrangements to accommodate an 8260 emulator.

In any case, given the recent events creating the new office under [redacted] it occurred to me that you may want to have him and [redacted] review this as well.
